

ARKANSAS RACING COMMISSION/EGS SECTION

Process for Approval of Rules of Play and Game Certification

1. GLI shall examine and test all games of skill and shall issue a recommendation to the Arkansas Racing Commission that the machine be certified as meeting the criteria under Arkansas Code Section 23-113-101 et seq (Act 1151 of 2005), or that the machine fails to meet that criteria. Games previously certified by GLI for use as a game of skill in Arkansas need not be re-submitted for certification unless there is a change affecting the Rules of Play.

Further, a game selected by the Franchise Holder for use at their facility must be submitted by the game manufacturer for certification including documentation as to the game designation and Rules of Play. Documentation is to address the element of skill. A copy of this documentation is also to be sent to the Arkansas Racing Commission - EGS Section.

2. The EGS Section will enter the submission on a database that will be linked to the Arkansas Racing Commission (ARC) website www.state.ar.us/dfa/racing. The EGS Section will analyze the documentation that was submitted and will furnish a written report for each game to the ARC. This report will contain the recommendation of GLI and the EGS Section. The request for Commission Certification shall be placed on the agenda for the next ARC meeting.
3. After consideration by the ARC, all certification approvals will be reported to GLI and the Franchise Holder requesting the approval. If the game is not approved, notice shall be forwarded to the Franchise Holder, manufacturer/supplier and GLI.
4. All approval or denial information will be entered on the ARC database.
5. Payment for testing will be made directly by the game manufacturer/suppliers to GLI.
6. No games may be placed into use until the Rules of Play and Game Certifications are approved by the ARC.
